

Sajad Mashood A

Software Engineer (Full-Stack) • Thalassery, Kerala, India

mashoodsajad@gmail.com • linkedin.com/in/sajadmashood • github.com/sj-ms-sudo

Summary

Full-stack software engineer with production experience building end-to-end web applications across frontend, backend, and integrations. Skilled in Next.js, React, TypeScript, NestJS, and MongoDB, with hands-on experience designing REST APIs, authentication flows, real-time scheduling systems, cloud deployment, and payment integrations. Also builds applied AI/ML and computer-vision projects independently (FastAPI, FAISS, InsightFace).

Technical Skills

Languages: TypeScript, JavaScript, Python

Frontend: React.js, Next.js (App Router), Tailwind CSS, Framer Motion, Responsive Design

Backend: Node.js, NestJS, FastAPI, REST API Design, Webhooks, JWT / OTP Auth

Databases: MongoDB, Mongoose, SQLite

Cloud & DevOps: DigitalOcean (deployment & server maintenance), AWS S3, Git, CI-friendly deployment

Other: Razorpay Payments, FAISS, PyInstaller, ISC2 CC (Security)

Experience

Lead Software Engineer — Psyra

March 2026 – Present

Kochi, India

- Lead development across frontend, backend, and product engineering for production web applications built with Next.js, React, TypeScript, NestJS, MongoDB, and Tailwind CSS.
- Migrated and maintain the production backend infrastructure on DigitalOcean, handling server provisioning, deployment, and ongoing uptime and maintenance.
- Integrated AWS S3 for scalable file/media storage across the platform.
- Designed and shipped a psychologist scheduling and availability module: real-time, conflict-safe slot management, OTP-based authentication, JWT access/refresh tokens, and route-level protection.
- Integrated booking and payment workflows with Razorpay (order creation, webhook signature verification, rate limiting) and connected them into existing production booking flows.
- Built a configurable mental-health self-assessment engine (dynamic question banks, weighted scoring, severity bands) with REST APIs, MongoDB data modeling, and an admin review dashboard.
- Own backend API design, database schemas, and business logic while contributing to UI/UX redesign, code review, and delivery oversight for the engineering team.

Selected Projects

Psyra Psychologist Portal — Booking, Availability & Payments Module *NestJS, Next.js, MongoDB, Razorpay*

- Built a full-stack scheduling module with a real-time slot-locking system, email-OTP auth (MongoDB TTL indexes), and an admin console to override any psychologist's schedule.

IndoLettings — Property Management & Real Estate Platform

Next.js, TypeScript, Tailwind CSS

- Built a multi-service real estate platform end-to-end: filterable property search, live mortgage/rental-yield calculators, and a reusable content-template system driving 12+ routes.

Onverse Digital Academy — EdTech Marketing & Admissions Platform

Next.js, TypeScript, Google Sheets

API

- Independently built an admissions site with a lead-capture API, a gamified scoring/quiz engine, and SEO/analytics (JSON-LD, GTM) as a solo freelance project.

FaceCluster — AI Face Detection, Recognition & Clustering Platform

FastAPI, React, InsightFace, FAISS

- Built an end-to-end computer-vision system that embeds, indexes (FAISS), and clusters (DBSCAN) faces across a photo library, with async background pipelines and a React UI.

Education

B.Tech, Computer Science and Engineering

Oct 2020 – Jul 2024

College of Engineering, Munnar

Certifications

ISC2 Certified in Cybersecurity (CC) • Google Cybersecurity Certificate • IEEE Xtreme
