## EXPERIENCE

## EXPERIENCE

### Full Stack Developer

2026

*Psyra*

*Kannur, Kerala*

- Built and maintained a config-driven self-assessments module (NestJS, MongoDB, Next.js) supporting 9+ mental-health assessment types with dynamic scoring, severity bands, and AI-generated personalized results.
- Designed and implemented the psychologist portal's booking system: OTP + JWT authentication, a 24-hour per-psychologist availability grid, and a Razorpay payment webhook pipeline with automatic, idempotent slot booking.
- Contributed to the Psyra mobile app backend (Flutter client) — OTP-based signup/login modules and JWT session issuance for end users.
- Integrated Meta Conversions API into the Razorpay payment webhook flow for accurate purchase-event tracking.
- Led the migration of Psyra's backend infrastructure to DigitalOcean.
- Mentored junior interns and led delivery on venture and client engagements sourced through Psyra's founders, including Onverse Digital Academy, Sahal & Co, and Four Colours.

### Full Stack Developer (Private Client Engagements)

2026

*Independently contracted via Psyra's founders*

*Remote*

- Built production-ready websites end-to-end for international private clients, including BuildOn Trading LLC (UAE) and IndoLettings (UK), using React, Next.js, and Tailwind CSS.
- Developed reusable UI components, responsive layouts, searchable/filterable catalogs, and SEO-optimized landing pages.

## PROJECTS

### Face Clustering Engine | *React, FastAPI, SQLite, FAISS, InsightFace, Tauri*

Personal Project

- Built and deployed a full-stack, local-first face clustering desktop/web app (Render + Vercel) with a live processing-pipeline dashboard.
- Implemented 512-dimensional facial embeddings (InsightFace), FAISS vector indexing, and unsupervised identity clustering via DBSCAN.
- Refactored the FastAPI backend for memory-constrained deployment using lazy initialization and thread-safe singleton services.

### Psychologist Booking Portal | *NestJS, MongoDB, Next.js, Razorpay*

Psyra

- Built the psychologist-facing scheduling dashboard and backend availability engine powering client bookings on the main Psyra site.
- Connected Razorpay webhook payment confirmation directly to slot booking with duplicate-webhook protection.

### Onverse Digital Academy | *Next.js, Framer Motion, Tailwind CSS*

Led Interns | Vercel

- Marketing and admissions site for a digital-marketing training institute, featuring a scored AI-readiness quiz and a lead-capture application flow.
- Directed intern contributors while owning SEO architecture (metadata, sitemap, structured data).

### Sahal & Co | *Next.js, Framer Motion, Tailwind CSS*

Led Interns | Vercel

- Creative-performance agency marketing site with animated portfolio browsing and scroll-synced case-study navigation.
- Directed and reviewed intern implementation while defining the component/data architecture.

### IndoLettings | *Next.js, TypeScript, Framer Motion*

Solo Build | Private Client

- Built solo, end-to-end, a London property agency marketing site with slug-driven content routing and interactive mortgage/rental-yield calculators.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, TypeScript, C/C++, SQL

**Frontend:** React, Next.js, Vite, Tailwind CSS, Flutter

**Backend:** NestJS, FastAPI, Node.js, Express.js, REST APIs, JWT Auth, RBAC

**Databases:** MongoDB, PostgreSQL, SQLite, MySQL

**AI/ML:** FAISS, InsightFace, OpenCV, scikit-learn, NumPy, DBSCAN

**Security:** Burp Suite, packet analysis, OWASP fundamentals

**Tools & Deployment:** Git, GitHub, Linux, Vercel, Render, DigitalOcean

## CURRENTLY SHARPENING

Building a raw packet sniffer (C/C++, Phase 2) to deepen low-level networking and offensive-security skills, alongside structured practice in Burp Suite, CTF challenges, and DSA (LeetCode).

## EDUCATION

**College of Engineering Munnar**

2020 – 2024

*B.Tech in Computer Science and Engineering*

## CERTIFICATIONS & ACHIEVEMENTS

---

ISC2 Certified in Cybersecurity (CC) · Google Cybersecurity Professional Certificate · IEEE Xtreme 17.0 Global Top 1000 ·  
HackerRank Software Engineer · HackerRank Python (Basic) · HackerRank Problem Solving (Basic)
